

SOLAR ATTIC FAN

HOA / POA APPROVAL PACKET

Energy Efficient. Low Profile. Professionally Installed.
Designed to Protect Your Home.

832-925-0830

SMART VENTILATION THAT WORKS FOR YOUR HOME

POWERED BY THE SUN

Runs on free solar energy with no increase to your electric bill.

REDUCES ATTIC HEAT

Helps remove excessive heat and moisture to improve comfort and protect your home.

WHISPER QUIET

Designed for quiet operation you can't hear inside your home.

BUILT TO LAST

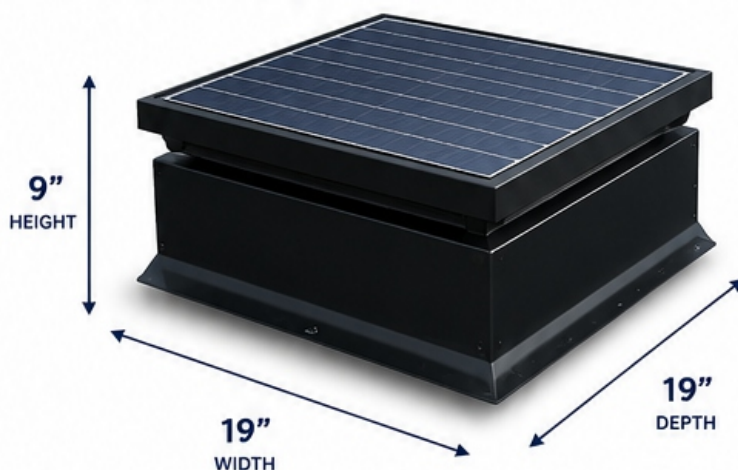

Durable, weather-resistant design backed by a lifetime warranty.

PROFESSIONALLY INSTALLED

Installed by certified local professionals. No DIY required.

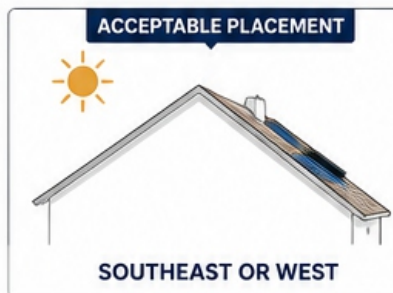

FAN DIMENSIONS

Low-profile design sits only 9" above the roof.
Discreet appearance that blends with your roofline.

TYPICAL ROOF PLACEMENT

For maximum efficiency, solar attic fans are typically installed on south or southwest facing roof slopes to receive the most sunlight throughout the day.

Exact placement on the roof will be determined to meet HOA guidelines and ensure optimal performance.

EXAMPLES OF INSTALLED SOLAR ATTIC FANS

The fan sits low and unobtrusive on the roof and is designed to blend with your home's appearance.
